

TOKO LISTRIK

Karapitan

EVERYTHING YOUR STORE NEEDS,
ONE CLICK AWAY

Made available in desktop native-like application
using progressive web application (PWA) technology
to ensure wide compatibility of your application

SOME AVAILABLE FEATURES

Multiple Divisions

Thinking of expanding your team? Don't worry,
we got you covered. We made this application
available to multiple division to ensure your
company's expandibility. Said divisions includes
Sales, Purchasing, Accounting, Finance,
and **Warehouse**

User Oriented

Made less prone to human error, we use one of the best
UI UX designer to make this application possible!
Other than that, we use API technology to speed up data
transfer between clients' devices

Easy Report

Want to find out what item is sold the most?
Or the revenue of your store?
Or even what item should be restocked?
LEAVE THEM TO US, we will make reporting
as easy as clicking your mouse

WHAT WE MAKE TO MAKE YOUR COMPANY BETTER

Allow you to work remotely

Make your application available in the cloud server, allowing you to work anywhere you'd like!

Stay update with the latest data

No need to manually settle your store data. We are the one responsible for that

Everything is integrated, increasing your financial statement accuracy

Tired of generating financial reports? No worries, we will do those tasks for you. Our application will automatically calculate store revenue and balance sheet.

Easy to learn, easy to use

We will try to minimized your staff training cost by building the application as simple as possible.

Everyone can work systematically

Everyone has their own daily tasks, working systematically, making it easier for you to supervise.
